

# VALENTINO COPPERI MORAZZO

## FREELANCE FULL STACK DEVELOPER

+54 9 2494 628279 | [valentinocopperi@gmail.com](mailto:valentinocopperi@gmail.com) | [Personal website](#)

I am a Systems Engineering student and an experienced freelance Full Stack developer. I have knowledge and hands-on experience in both frontend and backend development, which allows me to build complete, scalable, and efficient applications. I am eager to keep learning and growing professionally while contributing to innovative projects with high-quality solutions.

### SKILLS

**Languages:** Java - Typescript

**Frameworks:** Spring Boot - React - Next.js - Tailwind

**Extras:** AWS - PostgreSQL - SQL - MongoDB - Git - Shadcn - Docker

### PROFESSIONAL EXPERIENCE

#### Freelance Full Stack Developer

Jun 2024 - Act

Freelance Full Stack Developer specialized in building scalable and user-focused web applications, with experience in both frontend and backend development.

#### Responsibilities & Achievements:

- Developed RESTful APIs using Java and Spring Boot, implementing security measures such as JWT and OAuth2.
- Designed and optimized databases with PostgreSQL and MongoDB, ensuring data integrity, scalability, and performance.
- Implemented unit and integration tests to guarantee code quality and maintainability.
- Built frontend interfaces using React and Next.js, prioritizing accessibility and user experience.
- Integrated key features, including:
  - Subscription system with MercadoPago integration.
  - Real-time chat between buyers and sellers.
  - Image upload and storage via Amazon S3.
  - Analytics dashboard for both administrators and users.

### EDUCATION

#### Systems Engineering

Feb 2023 - Act

University of the Center of the Province of Buenos Aires

- Focus on Java, Object-Oriented Programming (OOP), Spring Boot, Jakarta EE, and Hibernate.
- Database management, including optimizations, indexing, and triggers.
- Software architecture, design patterns, and best practices.
- Web development with RESTful APIs, security principles, and scalability.

#### TypeScript & React Course

Jun 2024 - Dic 2024

National Technological University

- Advanced React development with Next.js and component-based architecture.
- State management with Context API, Redux, and React Query.
- UI/UX design using ShadCN, TailwindCSS, and responsive web design principles.

### ADDITIONAL INFORMATION:

- **Languages:** Fluent in Spanish (Native), English (Intermediate-Advanced, B1).
- **Certifications:** First Certificate in English (FCE) – Cambridge Assessment English 2024
